

SADDLE FIT CLINIC: APRIL 24, 2010

by Saddles That Fit! Independent Saddle Fitters

Learn How to Know when a Saddle Really Fits

Does YOUR HORSE have Issues?

Walking off, biting, girthy, bucking, runs away, stumbles, can't relax, white spots?

Do YOU have Issues?

Feel insecure and out of balance? Knees hurt? Have you come off your horse?

A properly fitting saddle will:

- Help you ride SAFER
- Help your horse RELAX
- IMPROVE your BALANCE
- IMPROVE your PERFORMANCE
- Help you & your horse stay HEALTHIER

Participants get an understanding of how a saddle is meant to work by seeing and then feeling good and bad fit on bare trees during the morning Saddle Fit discussion.

Clinic Format:

9am - 4pm: Starts with a hands-on discussion of the mechanics of the horse and the function of saddles. Then participants apply that information by walking through a full saddle fitting with a horse & rider. Everyone learns how to feel for fit and to read what the horse has to say about fit with a rider trying out multiple saddle brands that fit better than most.

Lunch is included in the clinic fee. (*\$50 of your Auditor fee will be credited towards a personal fitting.*)

Call Rancho Rociada to reserve your space

Participants limited to 12

916-870-9411 / 916-847-2995

All participants help evaluate fit of multiple saddles and then watch a rider and horse try the best saddles to fine tune the differences between what fits and what doesn't.

Location: Rancho Rociada, El Dorado Hills, CA; Hands-On Audit: \$80
